GPT-5.6 Is Now Live in Clio Work and Vincent

Written by Jake Rutherford

Every model upgrade has to earn its place by improving the work customers receive, and GPT-5.6 did exactly that. Starting today, GPT-5.6 is available in Clio Work and Vincent.

In Clio's legal-research evaluations, Vincent with GPT-5.6 scored 6% higher for completed-answer quality than with GPT-5.5. It also identified 6% more of the authorities our legal experts expected to find during research. For customers, that means a stronger first answer and a broader research process.

Better answers, anchored in authority

We evaluated representative legal-research tasks using expert-defined criteria for the completed answer and the authorities identified during research. These measures capture two distinct parts of the work: the quality of the answer Vincent delivers and its ability to find the legal authorities our experts expected to see along the way.

The results point to a more complete first pass. GPT-5.6 helps Vincent answer the legal question more effectively while surfacing more of the expected authorities during the research process. Lawyers begin with stronger work to review, verify, and develop further.

Legal research improvements

Relative improvement compared with GPT-5.5

Source: Clio's evaluations of GPT-5.5 and GPT-5.6 in Vincent. Relative changes rounded to the nearest whole percentage.

In our transactional client-matter evaluation, GPT-5.6 also used 3% fewer model tokens while delivering broadly comparable overall performance.

A model upgrade is valuable only when it improves the work delivered to legal professionals. Vincent and Clio Work continue to combine advanced AI models with authoritative legal content, transparent sources, and workflows designed for legal work.

Sources are visible and the work product is reviewable, helping legal professionals verify the result and apply their judgment with confidence. GPT-5.6 strengthens that experience, and it is available in Vincent and Clio Work today.

About Clio

Clio is the global leader in legal AI, powering legal work across the profession, from law firms of every size to corporate legal teams, government agencies, and courts. Its Intelligent Legal Work Platform unites the business and practice of law, connecting the people, information, and processes behind legal work. Clio's AI brings the context together with legal sources drawn from Clio Library, a growing collection of more than one billion legal documents. Over 400,000 legal professionals in more than 130 countries rely on Clio to run their legal world. Learn more at www.clio.com.
