Clio and Perplexity partner to bring Vincent's legal intelligence into Computer for Counsel

Written by Jesse Glazer

Clio, the global leader in legal AI, is partnering with Perplexity to make Vincent by Clio available through Computer for Counsel via a new Model Context Protocol (MCP) connector.

Set to launch in the coming months, the connector will enable legal teams to access Vincent's legal research, citator analysis, and authority-backed legal reasoning from within Computer for Counsel. The partnership expands where customers can access the strengths of Vincent while maintaining direct connections to authoritative legal sources.

"We're moving from a world where people learn tech to a world where tech learns what people are trying to accomplish," said John Foreman, Chief Product Officer at Clio. "AI is accelerating that shift. In legal, the value of those systems depends on the quality of the intelligence beneath them. Vincent was built to provide legal answers grounded in authority, both in the form of Clio Library and a firm's own documents. We want to ensure that wherever a law firm works, including Computer for Counsel, we can support the firm with access to Vincent and ground-truth legal data."

Shared customers will be able to access Vincent's research capabilities from within Computer for Counsel. Outputs will be grounded in Clio's legal corpus of more than one billion documents spanning case law, statutes, regulations, court rules, and secondary sources across more than 100 jurisdictions. Every result will link back to verifiable legal authorities, enabling lawyers to validate findings and confidently incorporate them into legal work product.

For enterprise legal teams, the partnership reflects an evolution of the legal AI stack. AI models are increasingly being connected to specialized intelligence systems that provide domain expertise, authoritative data, and professional-grade validation. Through this integration, Vincent becomes available as a legal intelligence layer within one of the newest AI platforms built specifically for legal professionals.

Clio and Perplexity will share additional availability details and customer programs in the coming months. To learn more visit: clio.com/enterprise.

About Clio

Clio is the global leader in legal AI, powering legal work across the profession, from law firms of every size to corporate legal teams, government agencies, and courts. Its Intelligent Legal Work Platform unites the business and practice of law, connecting the people, information, and processes behind legal work. Clio's AI brings the context together with legal sources drawn from Clio Library, a growing collection of more than one billion legal documents. Over 400,000 legal professionals in more than 130 countries rely on Clio to run their legal world. Learn more at www.clio.com.
