Legal Pad drafting workspace now in Vincent

Written by Sasha Perrin

Lawyers are increasingly using Vincent to analyze legal issues, review documents, and develop arguments. Turning those insights into a finished memo, advisory note, or contract language often requires moving between AI conversations and external word processors while assembling text into a coherent draft.

Legal Pad addresses this gap by giving lawyers a dedicated space to develop draft documents while remaining connected to the research and reasoning that produced them.

Within Legal Pad, users can assemble multiple Vincent outputs into a single draft and revise sections while referencing the prompts and materials that informed the analysis. The workspace allows lawyers to shape early versions of research memos, advisory guidance, and legal arguments before exporting documents for final formatting in a word processor.

“Documents are the atomic unit of legal work,” said John Foreman, Chief Product Officer at Clio. “Analysis matters, but the deliverable is always a document. Legal Pad gives lawyers a place to turn the reasoning they develop in Vincent into draft documents without losing the context that shaped the work.”

Legal Pad supports the stage of drafting where lawyers organize ideas, refine arguments, and assemble early versions of legal documents. By keeping drafting connected to Vincent’s analysis, legal teams can move from research to writing without losing the context behind their conclusions.

The launch reflects Clio’s continued development of Vincent as a platform where legal reasoning develops alongside the tools lawyers use to examine information and produce written guidance.

The announcement also supports Clio’s continued investment in the enterprise segment through Clio for Enterprise, the company’s division focused on large law firms and corporate legal departments managing legal operations at scale.

About Clio

Clio is the global leader in legal AI, powering legal work across the profession, from law firms of every size to corporate legal teams, government agencies, and courts. Its Intelligent Legal Work Platform unites the business and practice of law, connecting the people, information, and processes behind legal work. Clio's AI brings the context together with legal sources drawn from Clio Library, a growing collection of more than one billion legal documents. Over 400,000 legal professionals in more than 130 countries rely on Clio to run their legal world. Learn more at www.clio.com.
